Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments are considered and acknowledged but they are not persuasive. The previous Office Action still applied because the prior art would not ent the applicant's claims in their broadest interpretation. For example the Applicants argue. "Spitz does not identically disclose (or even suggest) the feature that the phase terminal is structurally configured identically to one of the positive terminal or the negative terminal axis of the terminal to get in relation to an ornelation of one of the structurally identically configured positive terminal axis of the terminal turned in relation to an ornelation of one of the structurally identically configured positive terminal or the negative terminal. "Spitz does teach above limitations. Spitz discloses the phase terminal tay, 19, 1, engitive terminal or the negative terminal axis of the terminal topic and the production of the structural production of the structurally identically configured positive terminal or the structurally identically configured positive terminal axis of the terminal tay in relation to an orientation of one of the structurally identically configured positive terminal axis of the terminal tay in relation to an orientation of one of the structurally identically configured positive terminal or the structurally identically configured positive terminal axis of the terminal tay in election model of the structurally identically configured positive terminal axis of the terminal tay is a production of the structurally identically configured positive terminal axis of the terminal tay is the structurally identically configured positive terminal axis of the terminal tay is relation to an orientation of the structurally identically con
